Newlands Thinks Annexation of Cuba Will Be Urged. The Appropriations.

ASHINGTON, July 2.—(Exclusive Dispatch.) -Secretary Hay intends to psoceed immediately with the work of negotiating for the control of the Panama Canal in order to ascertain at the earliest possible date whether a good title to that route can be secured by the United States. There is no question whatever that the administration intends to proceed without the least delay with canal work under the bill that passed Congress, and today there was an important conference at the State Department between Secretary Hay and Senators Hanna, Lodge and Spooner regarding the steps that need to be taken to get work under way at the earliest possible moment.

sible moment.

Becretary Hay called in those Senators who were most responsible for canal legislation in order to find out from them exactly what Congress meant by the bill that it passed. It is understood that at the conference a complete agreement was reached to make every possible effort to get control of the Panama Canal route, even trol of the Panama Canal route, even if it becomes necessary to ask Congress for further legislation next winter. It is not believed that the step will be necessary, but there is very little doubt but that the President would ask Congress for new legislation rather than accept the Nicaragus route in the face of the report of the commission and the action of Congress against it.

SALT LAKE, July 2.—[ExclusDispatch.] Paying Teller Alex A. R. Dispatch.] Paying Teller Alex A. Robertson and Assistant Cashier Harry T. Duke, of Wells, Fargo & Co.'s Bank, in this city, are locked up in the County Jail tonight on a charge of embezzling 26,000 of the bank's funds. The arrest was made on information filed with County Attorney Christenson by I. N. Thacker of San Francisco, special detective for Wells, Fargo & Co., and the warrants were issued by Justice Nielson. Both men were taken before that official and remanded in the sum of 30,000 each.

This ends the first chapter of the story which has been current about the story which has been current about the bank for the past four days, and which became public through the disappearance of Paying Teller Robertson, Satturday last, and his subsequent return Sunday. Neither of the bank officials under arrest will talk, but it is known that the embezzlement extends over a series of years, and it is likely to exceed the sum stated.

It is the old story retoid, in which wine, women and gambling figure. The strange feature in connection with the entire affair is that the two men arrested have long been known to have been living largely beyond their means.

Holds Up Four Men and Steals a Launch.

Lands at Ballard, Six Miles from Seattle.

Told His Prisoners That He Had Murdered Merrill-Posse in Pursuit.

BEATTLE (Wash.) July 2.—Henry Tracy, the escaped convict from the penitentiary, arrived in Seattle tonight in the launch stolen by him at Olympia. He impressed a crew of four men at the point of a rifle and compelled them to bring him to Meadow Point, just outside the Northern Railway line of Seattle. Compelling two of the men to bind first one and then another of the beatmen, he aided a third one in tying another man hand and foot. Taking the fourth man with him he deharked and went into Bailard, six miles from this city.

There he ordered his involuntary companion to leave him. Capt. Clarke, master of the launch, his son Edwin and the two men of the crew are in Seattle and have given a complete ac-count of the affair to the county and city authorities. The latter have or-panized and are in pursuit.

BY THE NEW ASSOCIATED PRESS-P M.1
SEATTLE (Wash.) July 2.—Advices received from Olympia tonight state that Tracy, the escaped Oregon convict, stole a gasoline launch this moraing at South Bay and started up the Sound. The isunch is the largest of the kind on Puget Sound and has 300 gallons of gasoline, or enough for a 1000-mile run. Before starting Tracy said he intended firing a few shots at the penitentiary on McNeil Island. He said that he had murdered Merrill, but the statement is not believed. He gave as the reason for the alleged deed that Merrill was growing faint-hearted. It is believed, however, that the latter is in the vicinity of his sister's home at Shelton.

in the vicinity of his sister's home at shelton.

Tracy, according to the advices, must have passed through Olympia about midnight. At 5 o'clock this morning he appeared at the plant of the Capitol City Oyster Company at South Bay and entered the house of Horatio Alling, one of the employés. Another employé, Will Lattridge, was in the house. Tracy told who he was, and began to prepare his breakfast, the two men being warned to keep quiet. While Tracy was cooking his food, Frank Scott and John Lessenger, also employés of the company, entered. The convict then made the four stand with their faces to the wall, holding up their hands. At this juncture, Capt. Clarke of the gasoline launch N. & S. and his son entered. They, also, were forced to stand with their faces to the wall, holding up their hands. At this juncture, Capt. Clarke of the gasoline launch N. & S. and his son entered. They, also, were forced to stand with their faces to the wall. During a conversation. Tracy learned that the launch was in the bay, and after he had breakfasted ordered the men to take him to it. He made Capt. Clarke get the engine in order and start it for him. The captain then jumped ashore and Tracy started on his trip down the round. It was then about 10 o'clock. Although he had revealed his identity to the men, they did not report the matter to the authorities until late in the afternoon. The launch is exceptionally large and has made one trip to Alaska.

Lipton's First Yacht Races An Advertising Dodge -Then the King.

IBT DIRECT WIRE TO THE TIMES. NEW YORK, July 2-1Exclusive Dispatch]. If David M. Barrie, formerly American manager for Sir Thomas Lipton, tells the truth, doughty Tom does not care 30 cents for the America's cup, but has been giving the American people "hot sir," in order to boom "Lipton's teas." Barrie is suing him for something over \$11,000 which he alleges is due for services as advertising agent in the part he took in arranging the international yacht races.

According to Barrie, he conceived the idea that the challenge would be immensely profitable for Lipton, even though the cost of fitting out a yacht would reach \$1,000,000. Barrie alleges he has letters in his possession from Sir Thomas approving the challenge as a purely advertising scheme,

Barrie, it is alleged, made a special trip to London to talk the matter over with Lipton. Sir Thomas at first coyly demurred, but finally grasped the idea, and the Shamrock I was built. So enormous were the profits of the first venture that Sir Thomas had a patriotic call to try again, just to please his most gracious sovereign, King Edward VII.

SLOT-MACHINE CASE.

IBY THE MEW ASSOCIATED PRESS—P.M.1
FRESNO, July 2.—The cigar dealers secured another victory today in the long-pending fight between them and the City Trustees. A little over a week ago a number of dealers had their licenses revoked, for having slot machines in their possession, the Trustees proceeding under a recently-enacted ordinance, which made cigar men subject to police regulation. The dealers continued to conduct their business as usual, and they were arrested for selling goods without a libusiness as usual, and they were ar-rested for selling goods without a li-

SAN FRANCISCO, July 2.—That the local hackmen's union is determined that only initiated members holding drivers' cards shall be employed was evidenced yesterday by the unusual spectacle of a funeral procession being stopped in front of the Hall of Justice, when every driver dismounted from his seak and refused to proceed because it had been reported that there was a non-union man among them. The men were employes of G. Marini, from whose stable the hacks were furnished. An Italian by the name of Francis Ceaugno had been placed as driver on one of the hacks before a driver's card had been issued to him by the local union. He was forced to dismount, and after the owner of the carriage had been installed the procession continued on to the cemetery. Service division, submitted today to Secretary Shaw, shows that during the year there were arrested 535 persons charged with various offenses against the Federal statutes, New York leading with 35 prosecutions. Of the offenders, 413 were of American birth, the next largest number of offenders being Italians. Sixty-three per cent. of those arrested were convictd. During the fiscal year, but one dangerous spurious note was put in circulation, a 55 silver certificate, while there was only one even passable counterfeit, a 31 certificate, whose makers, with their complete plant, were captured in Chicago the same day they attempted to put one of their notes into circulation. In the New York district the circulation of "all silver" counterfeit coins has been reduced more than 80 per cent., as compared with the previous years.

Reference is made to the continued activity among criminals who make the "raising" of notes a specialty, and it is pointed out that this crime might be prevented by the adoption of a distinctive size of the notes of smaller denominations, the ones and twos to be, say, an inch shorter and one-half inch narrower than those of \$5 or over.

NEWLANDS WORKING TO BRING IN CUBA.

(BY DIRECT WIRE TO THE TIMES.)

ASHINGTON, July 2.—[Exclusive Dispatch.] Representative Newlands of Nevada said today that he fully believed that Cuban annexation would be a prominent topic at the next session of Congress. Mr. Newlands is one of those Democrats who worked most hopefully for reciprocity with Cuba, and he expresses the belief that the distress in the island will become so acute before next winter that the people there will be compelled to ask for annexation in order to bring themselves into good commercial standing with the rest of the world.

Mr. Newlands has already introduced in the times of the Cuban problem was the people of Southern California ever had to face. He stated that recent experiments show that everything raised by Southern California can be raised in Cuban under American methods and at greatly reduced cost, on account of cheaper labor.

WASHINGTON, July 2.—(Exclusive Dispatch.) Judge Penfield, solicitor of the State-Department, made this state-

calling or furnishing his address to
the department.

"The truth of the matter is that
Senator Bailey set out some months
ago to remove Gen. Clayton from his
office as Ambassador to Mexico, because Gen. Clayton would not take
instructions from him, instead of from
the Secretary of State. If I had joined
with Senator Bailey in his condemnation of Ambassador Clayton, whose
record before the department for
fidelity, discretion and efficiency is
most excellent, he would have omitted
his assault upon me in the Senate.

"Senator Bailey is one of those men

of asininity in which he indulges at
regular periods."

MOUNTAIN MEADOW CEMETERY.

CANNOT BE MADE NATIONAL. WASHINOTON, July 2.—The Secretary of the Interior recently opened a correspondence with the Secretary of War, as to the propriety as to taking means of reserving as a national cemetery the ground in Utah in which the victims of the Mountain Meadow massacre were buried. The troops, who buried the victims, marked the spot with a rock pile twelve feet high, on which was placed a board with the inscription: "Vengeance is Mine, Saith the Lord."

In bringing the matter to the attention of the War Department, Secretary Hitchcock says that the monument has fallen down, and many of the graves are uncovered. According to reports received by him, the Meadow is one only in name.

The question was referred to Col. Patten, Quartermaster's Department, who is in charge of national cemeteries. Col. Patten says that as those who lost their lives there were neither sailors, soldiers nor marines, the law under which national cemeteries are established could not be applied to the place in question, but Congress might possibly be asked for an appropriation necessary to provide a site and care for this historic spot. The Secretary of the Interior will be notified accordingly by Secretary Root. BY THE NEW ASSOCIATED PRESS-A.M. WASHINGTON, July 2.-The Security of the Interior recently open

July 2.—[Exclusive Dispatch.] California tracks will this rear, in all probability, lose a num-per of big eastern stables that have peretofore raced at Oakland and San heretofore raced at Oakland and San Francisco during the winter and spring. These stables are going to New Or-leans instead. During the past two years, Louisiana has been steedily gaining in popularity, and last year's turf war in California, which resulted in a monopoly of the racing game by the California Jockey Club, has decided many big owners to hereafter send their stables to New Orleans. Here-tofore California has had the cream of the eastern stables which indulge in winter racing, but that time is over. The Crescent City Jockey Club has in-

The Crescent City Jockey Club has increased the purses, stakes and added money events for the avowed purpose of undoing California and attracting eastern stables.

They are made low like the Roman seat, but instead of being made entirely of wood the seat is made of fine cord woven in fancy Indian designs. The four legs are enameled to match the seats. The colorings used in dyeing the cords will

not fade, and the designs are mostly of the conventional sort. These seats are suitable for porches, Indian and Oriental rooms, lawns, summer homes, beach cottages, etc. They can be had in colors which match hammocks. Sometimes a cushion is thrown upon them, but the seat is complete in itself and needs

no cushion as an ornament. These Bungalow Seats are made in Calcutta and are strong and durable. Many different colorings and patterns from which

HOW THE TIMES TREATS LABOR.

THE LOS ANGELES TIMES pays to its skilled workmen wages that aver-from \$3.75 to \$4.50 per day for time work, and from \$4 to \$5.50 per for piece work. These rates are higher than are paid by any competing y for piece work. These rates are higher than are paid by any competing vapaper. The Times pays larger aums weekly, monthly and yearly for or than any journal in all the Southwest. Its cash disbursements on this count between August, 1890, and the end of September, 1901, aggregated 207,020.51, and its annual expenditures for labor of all classes, both skilled a unakilled, now average more than \$175,000 per year. There never has a any attempt, in any quarter, to deny these specific and telling facts, the proprietors challenge such denial if made. The Times has a more liftul, reliable and satisfactory force of workmen than any rival newspaper ablishment; and not for years has it had any trouble with its workmen, or are independent of unions, loyal to their employers and to themselves, olishment; and not for years has it had any trouble with its workment, are independent of unions, loyal to their employers and to themselves, antisfied and prosperous. The Times controls its own business in its way, subject only to the laws of the laud; and no interference with control can be lawfully or justly made. The result of its fixed policy proven highly beneficial to all concerned, and the justness and correctness is course have for years past received public approval in most marked conspicuous ways, the circulation and advertising patronage of the paper lily and largely outstripping that of all local rivals.

In the Congressional campaign every State of the Union, we shall doubtless hear frequent, prolonged and doleful ululations from the ocratic camp regarding the "reck less" appropriations of the session of Congress which has just closed The lamentations of the esteeme Democracy on this time-honore theme are of such antiquity that the nemory of man runneth not to the contrary. Yet the irrefragable facts of history will prove to a demonstration that, notwithstanding the ever-vaunted "economy" of Democratic administra-tions, the country has uniformly been more prosperous, labor has been bet-ter employed at higher wages, the na-tional credit has been stronger, and the treasury has been better fortified, under Republican than under Demo-cratic administrations.

The appropriations of Congress for the "long session" just ended were unting in the aggregate, as summarized by Chairman Cannon of the House Committee on Appropria-tions, to \$750,063,857, exclusive of the large amounts which will be required for the isthmian canal, public build-Chairman Cannon, after giving in detail the appropriations under each of the more important bills, save:

"It is not inappropriate here to advert to the fact that the expenditures for the past two fiscal years, 1900 and 1901, show that during that period there has been applied to the sinking fund more than \$113,000,000, a sum greater than the law actually requires, and which exceeds the whole amount applied to the extinguishment of the public debt during all of the nine fiscal years from 1891 to 1899, inclusive.

In analysis which I shall submit it is shown that the appropriations made in the regular annual bills for ordinary expenses of the government payable during the fiscal year 1903, aggregate \$595,502,705, which, together with the sums carried under permanent appropriations and exclusive of nent appropriations and exclusive of the amount required by the sinking fund, makes a total of \$664,423,929.

"In the nature of things and in the light of past experiences, this entire sum will never be expended, but will probably be reduced in the neighborhood of 10 per cent. The revenues of the government as now estimated on the basis of the revenue reduction legislation enacted at this session amount to \$640,520,630. The expenditures to be made under the appropriations of this session will not exceed \$600,000,000, or a sum approximating \$40,000,000 less than the revenues, which we expect to derive under the which we expect to derive under the revenue laws as revised by this Con-

As against the above summation by Chairman Cannon, Representative Livingston of Georgia, the ranking Democrat of the House Comm Appropriations, has compiled a "statement" in which he makes out that the aggregate appropriations of the season amounted to more than \$1,000,-000,000. In order to make his figures foot up to this handsome aggregate, Mr. Livingston was obliged to include the entire cost of the isthmian canal, appropriations on continuing contracts for the improvement of rivers and harbors, and numerous other appropriations which will not make their full demands upon the treasury for some

It is true that the appropriations of the last session of the Fifty-third Con-gress (Democratic) for the force 1896 were less than those of the ses-sion which has just closed. But the Democratic Congress did not provide for the construction of an isthmian canal; we had no army in the Philippines; the naval and other necessary expenditures were less; the populainterests were narrower; the public debt was largely increased, and in-stead of surplus revenues we had def-icits. As Chairman Cannon shows in his summary, more than \$113,000,000 was applied to the sinking fund during the fiscal years 1900 and 1901-a sum greater than is required by the law, and more than the entire amount which was applied to the extinguishnine fiscal years from 1891 to 1899. THE SMALL FARM WELL TILLED. I The secretary of the Los Angeles Chamber of Commerce, on returning recently from a trip to the north, had several hours to spare at Fresno, and according to his usual habit made as thorough an investigation of conditions and things up there as the limited time would allow. Mr. Wiggins reports that he was astonished and de-lighted at the remarkable progress that past few years, and at the high degree of material prosperity prevailing in that section, which thirty years ago was an arid and almost unin-

That city has one attract ive feature with which Los Angele has nothing to compare an avenue twelve miles in length, planted alternately with red and white flowering eucalypti, fan palms and oleanders buildings of which Los Angeles would not be ashamed.

This instance of the value of small farms in promoting the prosperity of a section is timely just now, when several localities in Central and Northern California are making efforts to attract immigration. It is reported that one of these associations in Cen-"Appropriations, including authorized tral California has already met with big stumbling block in the shape of the big ranches which the owners refuse to subdivide or to sell at a reasonable price, preferring to wait until their neighbors make improvements, and thus make their land more valuable. The new garbage collection rule is perhaps something of an improvement on the old one, but it lacks much yet of being what it ought to be. There is still a loophole left through which the insolent garbage collector can crawl and talk back to people who are not expert in garbage sorting, and the curbs will continue to be disfigured with garbage cans and the overflow therefrom caused by marauding dogs with garoage cans and the overnow therefrom caused by marauding dogs and cats, the same as before. While there was a chance to perfect this busi-ness the perfecting ought to have been done. It is to be feared that murder or riot will yet result from a business that has heretofore and at all times

NOVELISTS TURNING ATTEN TION TO PLAYS

ONDON, June 18.—it looks now as if we should have the stage to thank for a thin output of first-class novels in the coming season. Julia Mariowe said in print the other day that the dramatised novel had a tendency to lower the dignity of her profession, and the novelists themselves seem somewhat inclined to agree with her, for in England, at least, nearly all the younger writers of the first rank, and some of the veterans, are at this moment thinking much more about plays than about books—plays written at first hand for the theater, and without any idea of prior publication in the form of novels. It's all a case of supply and demand, of course. The swifter the pace of the public, the more it turns to the theater, and the less solace it finds in the library. It became apparent over here more than a year ago that the output of fairly good, modern drams, lively enough and poignant enough to make an audience forget itself, was failing short of the requirement. On the other hand, there were altogether too many "pretty-good" novels, so the novelists are flocking over the fence into Pinero's back yard in greater numbers this summer than ever before.

too many "pretty-good" novels, so the novelists are flocking over the fence into Pinero's back yard in greater numbers this summer than ever before. Anthony Hope, encouraged by the well-earned success of "Pilkerton's Peerage," and discouraged perhaps, by the cold reception his latest serial is getting, is understood to be well on with another comedy. J. M. Barrie has been highly repaid by giving nearly all of his time to the drama since his rather unhappy "Tommy and Grizel" was published two years ago, Rumors of the forthcoming Kipling play are focussing into definiteness. Dr. Doyle is said to be working out the scenario of a drama in the hope that it will fulfill the promise of his "Waterico"—a promise left unredeemed by his play put on last year. His brother-in-law, E.W. Horaung, has been finding delight in the way Raffies, the hero of his "Amateur Cracksman" is working out as a dramatic character. Egerton Caste tells me he has half a dozen plays distracting his attention from his plans to write another novel. Mrs. Humphry Ward was busy most of the winter in dramatising "Eleanor," and Miss Cholmondeley was likewise engaged on "Red Pottage." Mrs. Craigie, the playwright, has well nigh deserted John Oliver Hobbes the novelist. After the success of Marion Crawford's version of "Brancesca da Rimini" in the hands of the Divine Sarah, you will hardly expect him to return wholly to the quieter Joys of writing his name on the back of publishers' cheques. I haven't heard of anyone who has offered to put "Sir Richard Calmady" on the stage, but if Mrs. Harrison's next heroshould happen to be of full length, the actor-manager will of a surety gather in the author. If it keeps on like this, Pinero and Henry Arthur Jones will have to take to novel-writing to keep the balance on the other end.

Mr. Marston, of the publishing firm of Sampson Low, Marston & Co., gives

Mr. Marston, of the publishing firm of Sampson Low, Marston & Co., gives another instance of Blackmore's curious jealousy of his one great novel "Lorna Doone." A cheap paper edition of that story being suggested to him, he whote to Mr. Marston: "It would not surprise me much if you made a hit with the sixpenny L.D., such is the thick-headedness of the many-headed . . . (One would like to know what the omitted words are,) If the other books, some of which are to know what the omitted words are, if the other books, some of which are of a higher order than L.D., could be made to go, I might defy the seanns yet before me. Blackmore was firm in his belief that his "Springhaven" was a better story than "Lorna Doone." Cheap editions of half a dozen of his novels are to be published here soon.

Henry James is ill yet, and the pub-lication of his new story. "The Wings of the Dove" has in consequence bear put off again until the autumn season.

Subscription blanks will be furnished on application at THE TIMES office or any of THE TIMES agencies. Money received on subscription by any of the aspirants for scholarships should be promptly turned in at THE TIMES office or handed to a regular TIMES agent, who will receipt for it and see that proper credit is given. A subscription blank filled out in duplicate, signed by the person to whom the money is paid, and handed to the subscriber, will answer the purpose of a receipt until a regular office receipt is substituted for it.

CHANCE FOR ALL TO VOTE

In order to give every subscriber of THE TIMES an opportunity to participate in the contest, by expressing his preference for some boy or girl who is working for a scholarship or cash prize, a coupon will be printed from day to day, which, if cut out, filled in as per directions printed upon it, and sent to THE TIMES, will be counted one point in favor of the candidate for scholarship honors whose name it bears.

The coupons which reach THE TIMES office each day before 6 p.m. will be counted and the score printed on the following morning. It will be interesting to watch the figures. In order to facilitate the count and keep things moving, it is hoped the contestants will "cash in" as frequently as possible. It is a good plan for those competing to let people know that they are in the running by having their gains reported from day to day. The public is more apt to help those who seem to be making progress than those who lag. Therefore, show by frequent reports that you are working.

Following is the score at the end of the second day:

SPECIALIST FOR MEN

A great many people do not seem to understand the difference between the general practitioner and the medical expert who has made a life study of one class of diseases. It follows without saying that the physician whose professional life work has been the study, treatment and cure of the complicated diseases of men is the one to trust—the one most successful Many people seem to be under the impression that every physician cures any and all diseases with equal success. It is an every-day experience with us to have a patient say: 'I have tried my family dector and a half dozen others, besides using nearly every remedy sold by druggista, for my trouble and have received no benefit—have at last come to the conclusion that I will throw aside my prejudices and try a specialist whe treats simply diseases of men."

If a man is alling from disease contracted or inherited, it becomes a serious guestion with him as to what the bed with the man is all the bed with the bed with the man is all the bed with the bed with the bed with the man is all the bed with the bed with the bed with the man is all the bed with the bed

MACDOWELL FINDS QUIET.

Actor and Family See Laguna Beach.

Washing in Ocean the Bill of Fare.

Rough Trip and Long Night in Deserted Hotel Not to His Liking.

Melbourne MacDowell, the distinguished tragedian and playwright, who, together with his wife (Miss Florence Stone) and his son, has been spending his vacation in Los Angeles, will leave today for San Francisco, to prepare for filling important engagements. He has in contemplation a trip to Australia, where flattering inducements have been held out to him, but has not yet decided as to when he will go.

Among MacDowell's experiences while lingering here was a trip to Laguna Beach. And you should hear him tell the story. It takes an actor to tell it right:

"We didn't like the looks of the dog and his crowd, so we walked across the way to a little grocery store, and I asked:

had gone across the street and taken possession of a cottage, the dog being left on guard outside. My wife was worn out, and was able to sieep; but I couldn't, so I sat on the porch and smoked all night, while the big dog barked at me

were going back on the stage.

"We were."

MacDowell tells with much sest of the trip back to El Toro, and of the efforts of the driver and several fellow-passengers to find out his name.

"Seems to me I've seen you before," said the driver. "Didn't you used to keep a sloon in Los Angeles?"

MacDowell joilled the party along and wouldn't enlighten the yearning of the driver for accurate information.

"Do you have many actors down here at Laguna?" the tragedian finally saked the Jehu.

"Actors—actors? No!" said the driver. "But we have a hell of a lot of rattlesnakes."

MacDowell is happy over the suc-

of rattlesnakes." MacDowell is happy over the successful issue of his suit to restrain other managers from producing his plays without paying him a royalty, and will at once take steps to settle the old score with those who have gone ahead without his permission.

He declares many things may be forgotten, but his trip to Laguna, never—it is such a "nice quiet place."

BURIED WITH POLICE HONORS.

Sergt. Morton and His Son Laid to Rest Side by Side in Rosedale Cemetery-Impressive Funeral Service,

One of the most impressive funeral services in Los Angeles in many months was held yesterday afternoon at the First Baptist Church, Flower at the First Baptist Church, Flower street between Seventh and Eighth, when tribute was paid to the late sergeant of police, S. G. Morton, and his son, Frank B. Morton. The latter died last Saturday and his father passed away early Tuesday morning. To the dead sergeant a police funeral was a accorded, and accompanying it was a G.A.R. funeral the sergeant having been a veteran of the Civil War, in which he made an enviable record. As a member of the police force he was the first man to die in service above the rank of patroliman, and therefore every member of the department not actually on duty turned out to do him honor.

Rev. Will A. Knighten conducted the
service, assisted by Rev. W. C. Clatworthy, assistant pastor of the First
Baptist Church. Dr. Knighten, in his
funeral sermon, dwelt upon the fidelity shown by the dead sergeant in the
performance of every duty, and the
lesson to his audience was that they
should emulate Sergt. Morton in his
faithfulness.

At the conclusion of the service the
remains of father and son were conveyed to Rossedale Cemetery, where
they were buried side by side, the two
caskets being lowered into the graves
simultaneously.

Among MacDowell's experiences while lingering here was a trip to Laguna Beach. And you should hear him tell the story. It takes an actor to tell it right:

"Laguna was recommended to us as a nice, quiet place," he said last night, "and it is. So my wife, my son and myself gathered up our luggage and started for Laguna.

"On our way down from the El Toro railway station through the beautiful cafion, I got into the good graces of the driver of the burgy in which I rode; my wife and son followed in another burgy. As I said, I got into the good graces of the driver, and he did his best to make the ten-mile drive, over a villathous road, as pleasant as possible. As we approached the end of the trip he became somewhat confidential, and leaned over my way and said:

"I deel awful sorry about bringing you out here."

"I didn't know why I deserved his sympathy, and nothing more was said about it; later on I had reason to recall it.

"We were set down, bag and baggage, at the hotel at 7 o'clock at night. The hotel was there, but not a living soul in sight. The dogra were open, and I went in to reconsioter, while my wife sat on the little steps outside. The building was empty; some old trunks were, pushed up against the wall in the hallway, and everything, was covered with dust.

"We were la an awful predicament; I went out, leaned against a post and told my wife about it.

"Well,' I said,' we can't eat-but we can wash. Yes, thank God, we can washed, why we washed. Then we washed, why we washed to get our money's worth.

"To the landlord; he's been down here once, and his wife has been down twice."

"We bought a little something to eat, and then went back to the hotel to see what we could do for the night. "The beds were all made up, and we selected what we thought would make us most comfortable, and went to bed. I hunted up all the lamps I could find and poured the oil from one to another until I found enough.

ifornia. "Fire in the mountains" is keeping the forestry department on the qui vive.

During the past month the "country, has been saved" at least thirteen times, for that is the number of fires of record, put out in time by the rangers on the San Gabriei and San Bernardine reserves. It is impossible to estimate what destruction of life, water and timber would have been wrought by the spread of flames.

Three factors go to make this saason the most perilous for the forests and the enormous dependent interests in years. First, the migration to the mountains is the largest on record, Second, the force of rangers has been greatly reduced. Third, the absence of late rains has caused vegetation to dry up much earlier than usual.

HOSTS OF CAMPERS.

HOSTS OF CAMPERS.

People are going to the mountains this summer in hosts. The migration has begun early and in a volume entrely unprecedented. City folks are going to the established resorts and country people in camp wagons. The glories of the mountains have always attracted great numbers of vacationists during the warm weather, but if the travel continues as it has begun this will be a record season. There is no limit to the beautiful spots of easy access in our Sierras, and hunting, fishing, climbing and bathing in the hot springs are only a few of the attractions. This vacation programme seems to have won an unusual popularity this season.

CONSECRATED AS BISHOP.

ISPECIAL CORRESPONDENCE OF THE TIMES.

SAN DIEGO, July 2.—At 16 o'clock this morning in St. Paul's Episcopal Church, Rev. Henry Bond Restarick became bishop of Honolulu, with all the impressive ceremony and pomp attendant upon such services. Five visiting bishops of the church were present, and the attendance was only limited by the auditorium's capacity, and was altogether an invitation affair. The visiting bishops are William Ford Nichols, San Francisco; J. Mills Kendrick, New Mexico; Thomas Augustus Jagger, Cincinnati; Joseph H. Johnson, Los Angeles, and William Hall Moreland missed his train, and did not arrive until noon, just in time for the latter part of the ceremonies, which occupied, altogether, three hours. About twenty-five clergymen from various sections of Southern California were present. The as tinder. At first it was intended to give the two reserves but twenty-three men, but the protest of the Chamber of Commerce to Land Commissioner Bin-ger Hermann caused him to provide six additional rangers, who will be put upon the San Gabriel reserve at once.

SUPERVISOR TALKS.

Everett B. Thomas, forest supervisor for the San Gabriel and San Bernardino reserves, said yesterday: "The danger of forest fires is much greater this summer than for years past. Fortunately there have been no serious fires so far, but the reduced force, lack of rain and extraordinary number of campers make the conditions very serious. Of course we candot do as good work with twenty-nine men as with forty. Petitions and protests are coming in all the time because of changes, but our only course is to do the best we cat with the force at our command.

"The force is reduced every fail, and then assignments are made at the beginning of the summer season. The reapportionment of the smaller forces has given every ranger a larger territory to look after than before; some of them have half as much again. Experience has shown that there is more danger in the brush-grown hills than in the timbered districts back in the mountains. Thousands of campers go into the cañons most easily accessible all through the summer, so the rangers have been massed along the front. We have to place the men where we anticipate the most danger."

CONSPIRACY UNVEILED.

Death of the Ringleader of a Band

NEW YORK, July 2.—A conspiracy against the life of the President of against the life of the President of Uruguay, Dr. Ceustas, has been discovered here, in a curious manner, says a Herald dispatch from Buenos Ayres. Carlos Pagganini was found dead in a street of this city. The police were investigating the case, when they received a communication saying that Pagganini was the chief conspirator against Cuestas. The communication further stated that the police would find in Pagganini's dwelling twenty-five kilos of dynamite. This statement proved true. It is understood that Pagganini backed out at the last moment in the conspiracy to assassinate President Cuestes, and that one of his fellow-conspiracy to assassinate President Cuestes, and that one of his fellow-conspirators killed him to prevent a disclosure of the

Bowen declared that the secretary was not the first person who had fallen into the error that all such provisions must be included in the specifications. The Council, he declared, would insert further binding provisions in the contract, when bids were presented.

"The Board of Public Works," he said, "has given this question thorough and careful consideration. To remove waste papers would cause a greatly-increased and needless expense. To include wilted flowers and bouquets would open the doors for the trimmings of trees and shrubbery and would entail upon the city a greater burden. All such substance can very easily be burned in the streets. Nearly everything else asked by the commercial bodies was included. There is slight doubt but that the contract will be properly

MUNICIPAL SALARIES.

When the much discussed salary ordinance was presented yesterday all went well until the Engineer's department was reached. Then Councilians Walker, between whom and City Engineer Stafford there is a feud of long standing, produced some deadly statistics. Walker believes that there are too many draughtsmen in the Engineer's office. In support of his assertion he stated that Fortland has two engineers, four instrument men and two draughtsmen; Cakland, two and two to one; Minnespolis, one and four to two draughtsmen. Cakland, two and two to one; Minnespolis, one and four to three; San Prancisco in 1888, two and five to two draughtsmen who are also included in the ten instrument men and eleven and four to three; San Prancisco in 1889, two and five to two draughtsmen.

Engineer Stafford then had an inning. He quoted from a report of the engineering department of Seattle, where about thirty street-improvement matters are pending, to show that Los Angeles has seventhan here. In Seattle hirty street-improvement matters are pending, and in the office is run much more economically. that citizens have given up improvements because they could not understand why it took so long to start proceedings.

The Engineer was finally asked to name the number of men necessary to enable him to catch up with his work by January, 1903.

No other furry was caused by the reading of the salary ordinance which the Councilmen had perfected in executive session last Monday. All salaries are grouped in departments and sparate ordinances for each department will be presented by the City Attorney next Monday.

In the aggregate the ordinances will increase the expense of running the city government 3697 a month. Of this sum 350 is represented by new laborers for the park department, and 334 by increases in the salaries of deputies, cierks and book-keepers. This estimate does not include the salaries of men who have been carried entirely on requisition in the past. "But. Your Honor, I am unprepared and ought to have a little time," said Bower.

"You've had a year too 'ong new," snapped the judge, and then there burst a little judicial volcano.

The judge didn't like the appearance of the suit at all, apparently, and said it looked to him like a blackmalling scheme.

"This is the sort of a case," said Judge Shaw, fercely, "that the courts ought to see are tried without delay. Here are big property interests at stake and many people may suffer hardships by reason of this sort of litigation—especially in a progressive community where real estate is moving in the market. It might castly occur that men could not sell their property because of this litigation, until they had gone round to this woman and paid her tribute. The abstract companies take cognizance of a law-suit like this, and it ought to be settled expeditiously. It certainly looks to me as if this were a blackmailing proposition. Judgment will be entered in favor of the defendants."

In a moment both Bower and "El Hutch" were on their feet to deny that any money had ever been made or paid, and stated that the court had no right to make any insinuations about blackmail on the part of Mrs. Sepuiveda. They said that, if she had waited too long to begin her action, the fact that her legal right might be in doubt would warrant her in bringing suit even after twenty years had lapsed, and the entire case hinged on the validity of the lis pendens, or notice of action filed in a former case, which, as the records show, has no date.

BEATTY ESTATE. Jane M. Beatty asks for letters of administration in the \$7600 estate of her late husband. Thomas E. Beatty, who died in this city on February 6.

WILL IS GUILTY. The jury trying the case of Will Powers, the "sleepy defendant, who kept Judge Smith and his court waiting until noon one day during his first trial, returned a verdict of guilty, and sentence will be passed on Monday. Powers is thus convicted of burglarizing a Japanese boarding-house. His first jury disagreed.

DIVORCE RECORD. Divorce suits were filed yesterday by Emma Gertrude Cornic against John W. Cornic, H. E. Finkenbinder against Fleet P. Finkenbinder, Marguerite L. Robinson against James H. Robinson, and Alice Oakes against E. W. Oakes. In Judge Conrey's court Lizzle Dutch was divorced from James Dutch on the ground of cruelty.

SHE IS INSANE. Eliza Washington, aged 35, of Pasadena, was sent to the asylum at Highland. She wants to kill herself.

to kill herself.

HILL ESTATE TAXES. County Assessor Caldwell filed a petition yesterday in the far-famed estate of Charles Hill. asking for an order of court directing the Public Administrator to pay \$1990.70 for State and county taxes. Several days ago formal demand was made on Mr. Kellogg, but he would not pay the taxes, city or county, without an order of court. The city authorities are eagerly watching the fate of Mr. Caldwell's petition, and the City Assessor may take similar steps in the near future.

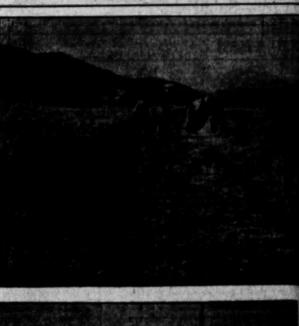

Some days ago a small boy was convicted of stealing some old iron and selling it to M. Cohn, a junk dealer. This did not entirely satisfy Justice Austin, however, and Cohn was called to answer for buying the stuff, contrary to the city ordinance, from a boy under 16 years of age. He was fined &, and there will be a determined effort at headquarters to break up the too-prevalent practice on the part of junk dealers of buying almost anything from children, regardless of age.

"Silver, which has been accepted as coin since the dawn of civilization, has been demonetized to add to the purchasing power of gold by decreasing the value of all forms of property as well as human labor."

"This, it was added, 'forbodes terrible social convulsions, the destruction of civilization, or the establishment of an absolute despotism."

"Recalling this remarkable prediction, it will be interesting to carry up to date the movement of prices in silver and in commodities since July 4, 1882. This will show how far 'all forms of property' have decreased in value, and will be timely in view of the new low record in silver's price. The subjoined comparisons give the price of silver in London, the price of wheat at New York, and the London Economist's 'index number' averaging all commodity prices, in July, 1892, and at the opening of each subsequent year (fractions omitted:)

TWO DAYS GLADNESS OF NORMAL ALUMNI.

BANQUET LAST NIGHT CLOSED THE PESTIVITIES.

President George A. Gates of Pomona College Makes an Address-Food Followed by Speeches-New Officers Elected-Dormitory Committee.

Testerday closed the two-days' session of the Normai School alumni, and as the end of their reunion drew near the night waned; but the exuberance of spirits waxed more and more, and the height was only reached with the singing of "Auld Lang Syne" at the farewell banquet, with throats atune and hearts and hands locked in the strong clasp of good-fellowship.

Yesterday morning the one-time graduates listened to an address by Dr. George A. Gates, president of Pomona College. The speaker aptity chose as his subject, "The Enlargement of Life." Quoting, he said: "Look out when God turns a man loose on earth with an Idea!" The idea invariably must be crucified, put it will rise again the third day, or sooner."

Dr. Gates strongly denounced the so-

sooner."

Dr. Gates strongly denounced the so-called wisdom of many men, denying that absolute knowledge is the lot of any, and advocated tolerance and plain any, and advocated tolerance and plain speaking as the wiser part for all.

"There are more things in heaven and earth, Horatio, than are dreamed of in your philosophy." seemed to be the text of Dr. Gates's final disquisition. He counseled everyone to use to the best of his ability what talents God has given him, and to trust Him, the All-wise, for the rest.

He expressed his firm belief in the doctrine of evolution—making clear its absolute harmony with the great, bread religious teaching of Christ.

THE BANQUET.

In the evening, under the softened light of hundreds of candles, the closing banquet was served. A long and excellent array of courses was placed before the 200 guests, and knives and forks moved to the swaying harmony of the blithesome music, floating out from the canopied corner in which Arend's Orchestra was stationed. After-dinner speeches settled the hearty meal, the witty Melville Dosier, vice-president of the school, being toastmaster. The first call was given to Miss Emma L. Hawkes, who was the original preceptress of the school,

"Our Pioneer Days," was not able to be present.

Then the assemblage and the orchestra tried to get together on a peculiar tune, entitled "Co-Ca-Che-Lunk." The result of their combined effort was certainly enthusiastic, if not altogether harmonious.

Several more toasts were responded to, that by Miss Louise Gray, on "The Present Outlook," being especially clever and appropriate. After the singing of "Auld Lang Syne" the entire party adjourned to the gymnasium, where dancing closed the festivities.

If she is lifting a dumb-bell she is made to begin with a light weight and work up to that which is heavier by a process that which is heavier by a process that will educate without overtraining her muscles. If she is being trained for running she is taught not to put forth all her efforts a tithe outset, so that when the last tug comes she will have be breath and strength left to bring her first to the goal.

PERSENVERE PATIENTLY.

of this sort, too, is making beds, where there must be constant bending over and rising again. In lifting and turning mattresses a women again has an opportunity to practice the art of lifting scientifically. The muscles of the arms and bust and shoulders also are developed by bedmaking, but not so much as by sweeping or by scrubbing. In this, as in every other household pursuit, care should be taken to work the muscles evenly. A sudden jerk will often do more harm than hours of steady effort. It is not necessary to be deliberate in one's movements. One may be brisk without being spasmodic.

So many of the occupations of housework exercise the muscles in a downward or a lateral director that it is well sometimes to give them something to do that will stretch them upward. For this reason there is benefit in dusting, where one must often reach up to the objects above one. There is very little heavy lifting in that sort of work, but even the slight action prevents the musces from becoming stiff or flabby.

CARE OF THE NECK.

One of the points that shows a mornal age at a animally early action. PERSEVERE PATIENTLY.

This is the sort of thing that the woman who is making her housework her means of physical culture has to learn for herself. Of course, she is bound to make mistakes at first, and there is danger that she will be discouraged and think she might as well give up any attempts to make anything more of the round of housework than an attempt to get it done in the best way she can and in the best time she tan. But it pays her to keep up her courage. She cannot expect great re-

CARE OF THE NECK.

One of the points that shows a woman's age at a painfully early period is her neck. A woman may have no wrinkles on her face, when her neck has become loose and unattractive. This is one of the things that housework should help, if the worker will intelligently direct her efforts toward remedying the trouble. To help a neck that is, so to speak, failing out of repair, the wise in such matters advise the patient to bend the head backward and then forward a certain number of times daily, and to bend it from one side to the other. The same sort of, work may be done in many kinds of housework. If the woman who wishes to keep her neck in good shape will recollect this when she is making beds or dusting, where she has to lift her face, or even when she is bending down over her ironing or turning her head to direct the course of her broom, she can accentuate all of these motions in an extent that will render the exercises far more helpful than they would ordinarily be. The adoption of electric power will lessen the expense of operating on the desert in no small degree, as it is estimated that electric power costing 75 cents will do the work of oil, costing \$2.

sents will do the work of oil, costing \$2.

The Consolidated company has already begun work on its holdings, and other camps do not let the hot weather interfere with gold extraction. The Yellow Aster company is employing a very effective and economical méthod known as 'glory hole' mining. Four men by this method can loosen and disintegrate 180 to 290 tons of ore a day. They expect to have several "glory holes" in operation.

MINES AND MINING.

Arrangements have been made to begin work on the Venture Hill company's property at Jerome early in July. Considerable local cash went in that company and recently considerable eastern capital was invested in the enterprise, and it is the latter that has made it possible to renew developments. The property has always been regarded as most promising.

PROPOSITIONS IN MEXICO.

Giving promise of becoming a second Cananea are what are generally known as the Cleneguita mines in Sonors, Mex., owned by the Cleneguite Copper Company. This property is situated a little southwest of Hermosilio Mountains in the lower part of the Sierra Madre Mountains, and about twenty-five miles from Sahuaripa. These mines are believed to be the lost Taypa mines, made famous in the days of the Spanish régime for their great production. The whole country is heavily mineralized throughout and these mines carry silver, copper, lead and some gold. Work now in progress is more in the nature of exploration, which is not a small task, as the claims cover an area of about four thousand acres.

News of a very rich strike in the old famous San Miguel mine of Cusi-huiriachic, Mex. have reached here. The find was made below the water levels at about the deepest workings. It consists of a solid body of vein matter five feet in width carrying ore valued at over 330 to the Helena Mining Compony.

Upon the report of the Chamber of Commerce Building Committee, at the meeting yesterday, that the deed to the Hellman holding adjoining the Chamber of Commerce lot on North Broadway was in escrow, and subject to the will of the chamber, the president and secretary were instructed to draw sufficient furids from the reserved to purchase the property in question. This will complete the title to the entire property, upon which the new Chamber of Commerce building is to be erected.

The thanks of the chamber were extended during the visit here of the Utah Press Association:

Eighty-five-thousand-dollar Deal in Main-street Business Property Closed. Some Other Sales.

An eastern syndicate has purchased two groups of mining claims in the Cherry Creek district of Arizona, not far from Prescott. The Iowa Gold Mining Company was organized following the sale, and it will begin active development work at once. The property adjoins that of the Boyer, which has produced \$25,000 in gold, with only about 800 feet of development done. A ledge carrying high values is the most important item about the prospect.

REDLANDS, July 2.—The city is in gala attire. The streets are lined with flags and brightly-colored bunting. The decorations promise to be one of the features of the Fourth. Already Orange and State streets present an animated scene as the small army of decorators are getting in their work, and vehicles of all kinds are being rapidly driven hither and thither, and the sidewalks are crowded with pedestrians. It will undoubtedly be one of the greatest days in the history of Redlands.

It was voted last night that the proposed bond issue shall be applied to the purchase of 100 inches of Lytle Creek water, now leased from A. G. Hubbard; to pipe it from the Campbell box to the city reservoir, where it shall be used for power purposes: to purchase twenty-two acres of land in the water-bearing district lying east of the city, on which the city holds an option, and to properly pipe the whole city with mains and laterals. Next Tuesday night, the Trustees will decide which of the supplementary propositions under consideration shall be adopted. These include that suggested by the committee of nine, recently appointed by the Trustees to go into the matter thoroughly, and which submitted an exhaustive report, favoring the purchase of the twenty-two acres of land mentioned and there developing 300 inches of water, pumping directly into the city's mains. John E. Garner has made several propositions. He will sell his well, corner of Highland and Waterman avenues, which is now pumping over one hundred inches of water, together with the motor and plant for \$20,000; or he will develop water up to 300 inches and sell it at \$165 per inch, or \$45,000 for the full flow. san Bernardino by November.

San Bernardino graphics of the graphopper pest in this vicinity have been greatly exaggerated. Horticultural Commissioner Curtis and Bosworth visited the infested district along the foothills yesterday. While the hoppers were found in large numbers in some orchards and fields, only in one ten-acre neglected orchard had any serious damage been done. The commissioners do not deem it necessary to take any steps to rid the country of the few hoppers that have so far appeared in this vicinity. James Capitas, a Greek, who has been working at the cement works at Colton, was arrested there yesterday on a charge of criminally assaulting the wife of a fellow-workman, at whose house he boarded.

Beginning today it will not be permitted to irrigate lawns and gardens between the hours of \$ p.m. and \$ a.m., so as to give the city reservoir opportunity to fill up during the night.

They agree to do all the preliminary work, and if they succeed in developing 150 inches, they will turn the whole plant over to the city for \$34.375. The Trustees went into executive session, and for over an hour considered the propositions separately, but arrived at no conclusions further than stated. SELF-SLAYER IDENTIFIED.

The old man who committed suicide Tuceday morning, was yesterday identified by his wife as William Watts Goodale of No. 414 South Flower street. Los Angeles. Though, Goodale went to many pains to cover up his identity, it was less than twenty-our hours afterward that the police were sure they knew his name.

Goodale shot himself in the back of the head on South Fair Oaks avenue Tuceday morning at about 8 o'clock, There was nothing in his pockets to indicate his name, saving a torn slip of paper in the inside pocket of his vest, which was a receipt made out by H. Wilson of Chicago to James Fair-childs. This led to the natural supposition that the dead man were Fair-childs. This led to the natural supposition that the dead man were Fair-childs. This led to the natural supposition that the dead man were Fair-childs. This led to the natural supposition that the dead man were Fair-childs, the impression, in all probability, which the suicide desired to give. But the receipt was evidently placed in the pocket as a blind, so that the man's family might not learn of his act.

Chief of Police Freeman had had a description of Goodale from the Los

Goodale was born in New York sixty-eight years ago, and later had been in the liquor business in Puebi-Colo. He suffered a parlytic stroke, which incapacitated him for work, and he came here with his wife three months ago. They were in poor circumstances, he being unable to get employment. Mrs. Goodale worked at the Van Nuys Hotel in Los Angeles. Goodale complained of his troubles and seemed despondent recently. He left home on Bunday, and fearing a tragedy, his wife hired a detective to find him on Monday. Before being found Goodale put an end to his life. His funeral will be held today, interment in Evergreen Cemetery, Los Angels.

HOTEL STEWART.

Rumor has had it that Colin Stewart was seriously considering the erection of his handsome hotel on the north-east corner of Lake avenue and Colorado street, instead of on the north-west corner of Los Robles avenue and Colorado street, as he at first planned. Last night Mr. Stewart denied the rumor, saying that he could not think of changing the original location, because there is no sewer on the corner of Lake avenue and Colorado. The only advantage in building the hotel at the greater distance from town lies in the fact that Stewart's Lake-avenue property has a greater frontage on Colorado street than the Los Roblesavenue site, viz., 650 feet by 256 on Lake.

SPRECKELS-LEAKE CASE.
Only a few spectators were attracted by the case of J. D. Spreckels and W. S. Leake, charged by Gov. Gage with criminal libel, when it was called in Justice Downing's court this morning. The Governor did not attend. Walter F. Bacon, as counsel for the defendants, objected to any further proceedings until the court had first been informed of the result of the actions pending in San Francisco. Assistant District Attorney Johnstone Jones expressed an intention to move for the issuance of a beach warrant for the arrest of the defendants.

A recess was taken after which it was decided to continue the case till 2 p.m. next Monday.

DECIDES JURISDICTION. DECIDES JURISDICTION.

IBT THE NEW ASSOCIATED PRESS.—A.M.1

SAN FRANCISCO, July 2.—Police

Judge Fritz has decided that he has
jurisdiction in the criminal libel case
instituted against John D. Spreckels
and W. S. Leake of the Call by Louis
P. Boardman. The court also holds
that there was nothing in the allegation of collusion, which point was raised
by W. W. Foote and A. A. Moore, attorneys for Gov, Gage. Judge Fritz
helds that after a criminal case once
gets into court anyone can come forward and present evidence.

July 10 was set as the date for holding the preliminary examination.

July 10 was set as the date for holding the preliminary examination.

The decision of Judge Fritz is based on the case of the people vs. Johnson. 71, Cal., page 384. In this case a man arrested in one township and taken before a justice of the peace and released on bail was rearrested in another township on the same charge, given a hearing and held to answer. An appeal was taken on the ground that the second judge had no jurisdiction, but the Supreme Court denied the appeal.

LONG BEACH, July 2.—The arrival of the first official train over the new electric road from Los Angeles this morning was made the occasion of a demonstration. When it pulled down the front the Sons of Veterans fired a salute from their field plece, and a large crowd of citizens received the visitors heartly. The party was in charge of F. Van Vranken, superintendent of the Long Beach division, and was composed of forty-one of the men who will have parts to play in the actual operation of the road. The trip was made to familiarise them with the track, and all the minutia of the run.
